

Case Study: Policy Design and Systems Reform

Tracer Study 2012

CLIENT

KEY ROLE

Led the national end-term tracer study under the World Bank's VTIP, evaluating labor market outcomes and institutional performance of ITIs to inform future skilling policies.

KEY HIGHLIGHTS

Designed and led extensive data collection through surveys, case studies, and ITI audits, with focused analyses across gender, caste, and Minority Districts. The study captured insights on employment, wages, apprenticeship experiences, and training quality, while also evaluating the functioning of TCPCs and IMCs. Economic impact was benchmarked using national per capita consumption data.
